## Senior Air Conditioning Engineer Required

Capable of working on refrigeration and air conditioning systems including water chillers and associated plant.

A working knowledge of boiler system with necessary accreditation would be an advantage as would BMS control system knowledge.

There is an opportunity for the right person to assist with managing key accounts, planning maintenance and submitting maintenance reports and remedial works.

Your skills:

The successful applicant will have the following skills and experience:

- City & Guilds Part 2 (2079) Refrigeration & Air Conditioning or equivalent
- Working knowledge of large Air Conditioning Systems.
- Knowledge of Electricity at Work Act.
- Knowledge of Health & Safety Regulation.
- The ability to climb ladders & towers.
- Ability to communicate with customers.
- Ability to liaise with management & workforce.
- Ability to act on own initiative.
- Driving licence.
- Total flexibility.
- Required to work overtime, as required.
- Required to become part of the 'call-out' team.
